HES-GT-5.0

Built for Canada

Solar Energy – An Investment that pays.

The HES-GT-5.0 has everything you need to start producing electricity from your home. The powerful rooftop solar system features Hanwha Solar modules – a reliable brand name you can trust to deliver rated power for decades. These sleek modules offer high efficiency silicon solar cells to maximize the output per area. Hanwha Solar panels include a 25 year warranty.

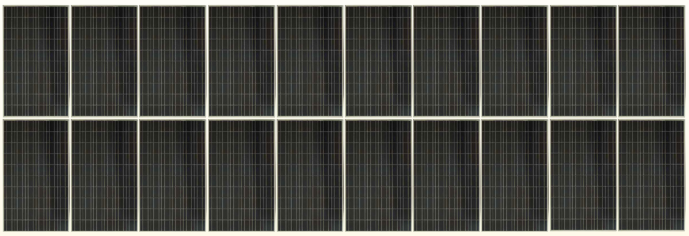
HES PV GT kits feature the Fast-Rack panel mounting system to secure the solar panels tight to the roof. This made in Ontario racking system is built for Canadian environments and mates with Hanwha's high performance solar panels.

Each system is engineered with performance, longevity and style in mind. These systems include high efficiency inverters with optional digital displays showing power production by day, month or since installation. All wiring components and safety equipment are of the highest standards and approved to CSA standards.

If you want to participate in any of Canada's solar programs, install a quality system with the name brands you can trust. HES PV and Hanwha Solar will make sure your system works for you.

SPECIFICATIONS:

Solar Array:	**5000 watts**
Brand:	**Hanwha Solar 250 W**
Warranty:	**25 years**
Dimensions:	**2 x 10 (130" x 403")**



Mounting:	**Fast-Rack Low Profile Rails,**
Includes:	**Hardware**
Includes:	**Inverter & Rooftop Wiring**
Production:	**5.0 - 6.95 MWh/year.**

* Expected output on a south facing, unobstructed slope:
